SUMMARY

Final-year Electronics & Communication Engineering student with proven experience delivering full-stack web applications, custom CMS architectures, and AI-driven growth systems. Demonstrated success managing cross-functional technical workflows and client delivery across India and the Gulf region. Seeking to leverage AI engineering, data analytics, and scalable web solutions within the Emirates Elevate Internship Programme.

EXPERIENCE & IMPACT

Freelance Web Developer & Client Solutions Lead | Independent Projects

Jul 2024 – Present

- **Scaled Client Web Presence:** Designed and deployed end-to-end web architectures for 15+ independent and client projects, boosting organic search traffic by 70% and enabling seamless client self-management via modular CMS implementations.
- **Aaysha International Institute (Education Platform):** Engineered a high-performance content management system that cut course publishing time by ~40% and established multi-channel visibility across Google Search, local client reviews, and AI search engines (ChatGPT / Gemini).
- **Gifting Brand, Hyderabad (E-Commerce):** Built a production web application with Razorpay payment integration and a secure admin dashboard, enabling reliable order flow, customer interaction tracking, and transaction handling under live traffic.

COO & CMO / Co-Lead | InnVox Solutions

Jul 2025 – Present

- **Built Growth & Operational Infrastructure:** Co-led technical operations and client delivery for an agency with 40+ projects shipped across India and the GCC; scaled conversion pipelines and automated onboarding workflows while eliminating external agency spend.
- **Streamlined Client Onboarding:** Designed a unified acquisition and communication framework that shortened project discovery cycles by ~35% and improved coordination across cross-functional technical and delivery teams.

LinkedIn Strategy & Direct Outreach Consultant | Luxury Automotive (Doha, Qatar)

May 2025 – Jul 2025

- **Drove B2B Pipeline Growth:** Managed executive positioning and targeted outreach, establishing verified connections with high-net-worth buyers, regional dealerships, and automotive industry leaders across the Gulf region and supporting qualified lead generation.

SELECTED ACHIEVEMENTS

- **Paytm BuildFor India AI Hackathon Finalist (Bengaluru, 2026):** Engineered an AI merchant growth product in the Merchant Growth AI track. Unified payment transactional data, customer behaviour models, and voice notes into a single analytics engine delivering actionable growth insights.
- **EY Techathon 6.0 (Ernst & Young, 2025):** Advanced through multiple competitive evaluation rounds (Round 1 & Round 2) via Unstop by solving complex technology and business case challenges under timed conditions.

TECHNICAL & AI SKILLS

Languages & Web: Python, JavaScript, HTML5, CSS3, REST API Integration

Platforms & Architecture: Custom CMS, WordPress, Vercel, Netlify, Domain & Hosting

AI & Developer Tools: ChatGPT, Claude, Gemini, Grok, VS Code, Git

Analytics & Infrastructure: Web Analytics, Payment Gateways (Razorpay), Performance Optimisation

Problem Solving: Solved 50+ Data Structures & Algorithms problems

EDUCATION & CERTIFICATIONS

B.Tech – Electronics & Communication Engineering | Techno International New Town, Kolkata (2023 – Present)

Class XII – CBSE | Prakritik High School, Bihar (2023)

Certifications: Claude 101 (Anthropic) · Web Design & Digital Marketing (Great Learning) · Design with Canva (Expert Level)
